- Databases
- Linux / VM / Docker
- SE / Agile Methodologies
- UI/UX Methodologies

LANGUAGE

- English - fluent
- Swedish - native language

OTHER

- Driver's Licence Category B

ABOUT ME

Computer Scientist in Applied AI, with a background as a store assistant. I have a structured and detailed-oriented mindset, with a strong willingness to understand complex problems. I am solution-oriented, with creative ideas on how to tackle problems. Quick-learner with a strong interest in widening and deepening my knowledge. I am looking for a role where I can continue to grow in the CS and AI field.

EDUCATION

Bachelor's Programme in Applied AI 2022 - 2025
Mälardalen University, Eskilstuna

- Bachelor's Thesis in collaboration with Volvo CE
 - Imputation / Prediction on Fuel Emission Factor Data
- Project Work: RAG-optimized LLMs
 - Developed a chatbot to assist students and staff at the University with questions about courses and programmes.
- Active board member in Mälardalens Ingenjörer (Student Association)

EXPERIENCE

Hemköp - Leksand Apr 2022- Jun 2025
Store Assistant

- I worked in almost all sections of the store, which included responsibility over the fruit and dairy sections, but also overall responsibility when closing the store. These included placing orders and planning sales to ensure fresh and clean sections that were well-stocked to ensure customer satisfaction.

ICA Maxi - Falun Apr 2021 - Mar 2022
Store Assistant

Me and my colleagues collaborated in restocking and fronting the dry-goods section, as well as keeping the store and warehouse clean and organized. Later, I became partly responsible for the frozen-goods section, where my colleague and I were jointly responsible for operations.

Hemköp - Insjön Feb 2020 - Feb 2021
Store Assistant

Gained hands-on experience in cashier operations and restocking, where I developed a strong sense of responsibility and learned how delivering excellent customer service creates positive and professional customer relationships.
